SUMMARY

- **Staff Software Engineer** at **Spotnana**, leading the development and architecture of scalable web and mobile platforms in the business travel domain.
- JavaScript enthusiast with over **15 years of experience** building high-performance, user-centric applications across startups and enterprise environments.
- Strong expertise in frontend architecture, system design, and performance optimization using cloud-native technologies.
- Proven track record of mentoring engineers, leading technical initiatives, and driving engineering excellence.
- Experienced in building AI-powered user experiences and improving engineering velocity through automation and modern AI developer tooling.
- A dedicated father and storyteller, bringing empathy, ownership, and long-term thinking into both leadership and product development.

WORK HISTORY

Spotnana - Staff Software Engineer

Remote

10/2024 - Current

- Designed **scalable frontend architecture** to support millions of users, with high performance and reliability.
- Implemented **role-based access control (RBAC)**, enabling flexible and granular access management through custom roles and groups.
- Developed a leaderboard to showcase AI models and their benchmarking scores, akin to the [Hugging Face leaderboard](#).
- Built features for **model fine-tuning and an interactive playground**, enabling seamless experimentation with AI models.
- Implemented **RAG pipelines** to integrate LLM capabilities into internal tools, significantly reducing onboarding time from weeks to rapid adoption.
- Created **data visualizations using D3.js** on top of MCP servers, allowing client admins to track and analyze monthly travel spend.
- Developed an **AI-powered chatbot** that understands traveler intent and orchestrates end-to-end business trip planning, including bookings, approvals, policy compliance, rebooking, and support.

Cowbell Cyber - Staff Software Engineer

Pune, India (Remote)

06/2023 - 08/2024

EDUCATION

07/2004 - 07/2008

**Army Institute of Technology,
University of Pune**

Pune, MH

Bachelor of Engineering:
Information Technology

SKILLS

Reactjs

React-native

Next.js

Three.js

Typescript

D3.js

Nodejs

Express

Nest.js

Prisma.io

Docker

kubernetes

Terraform

PostgreSQL

Aws

java

Java spring boot

Nextjs

Kubernetes

Grpc

Microsoft Azure

Cursor

Claude Code

- **SEO Performance.** Utilized **Sentry** and **New Relic** to maintain industry-standard **core web vitals**, leading to a significant improvement in **SEO** performance.
- **Unit Test Coverage.** Led initiatives to increase unit test coverage to 90%, leveraging Codecov and SonarQube to set quality gates, and enhance code reliability.
- **Real-Time Event-Driven Email Client.** Designed and implemented a real-time, event-driven email client using server-side events, and integrated notification services.
- Notification service: Developed a notification service from the ground up using Java, Spring, and Webflux.
- Upgraded legacy system to Spring Boot 3.x.
- **Reusable UI Component.** Spearheaded the development of reusable UI components, and maintained a comprehensive UI component gallery with Storybook.
- Quickly prototyped a D2C web application for data and risk analysis with Next.js, NestJS, Prisma.io, PostgreSQL, Elasticsearch, and Kafka.

Advance Auto Parts - Principal Software Developer

Hyderabad, TG

12/2021 - 04/2023

- Working towards building Omni channel experience.
- Developed smart banner to be displayed on mobile web, to encourage customers to jump from mobile web view to mobile native apps.
- Integrated with **sessionai**(AI/ML) tool to personalise discounting for customers. That led to improved conversions, sales and revenue.
- Used best practices to iteratively improve the core web vitals, thereby improving the SEO ranking of the web pages.
- Developed cloud API is written in expressjs, which acts as a facade layer for react native apps and the web.
- Made **shop.advanceautoparts.com** **CCPA** compliant. Integrated with onetrust.com.
- Revamped the whole search and checkout experience of e-commerce.
- Implemented market/store-based pricing, using Google PLA/LIA.

NetSPI - Senior Software Developer

11/2019 - 11/2021

- Recruiting and mentoring the frontend team.
- Developed B2B enterprise level logging software which would help Penetration testers to log their findings and vulnerabilities.
- SAML 2.0 compliant for access to federated users.

Optimize - Senior Software Developer

09/2016 - 11/2019

Killing it with javascript everywhere. Actively developing features and doing some feature enhancements for Optimize Web and Mobile app.

Codex
Nest.js
Typescript
Angularjs
Socket.io
Redux
Mobx
Recoil
Tanstack react-query
Zustand
Tailwind

- Prototyped and currently developing voice and video calls using **webrtc**.
- Currently spearheading the initiative of collaboration by integrating with **Microsoft Azure AD, Teams, SharePoint, OneNote** etc. Integrated with Microsoft Azure AD through OAuth2 with client-credentials and auth-code grant types.
- Implemented OAuth2 for clients to access data which they own.
- SAML integration.
- Working on charting and Visualization with **d3**. Developed bubble charts with d3 for predictive analysis. Have a look at my work so far fro visualization <https://www.willsnvision.com/>
- Upgrading from angular 1 to 2 was a decision point for us where we did some POC and found that React is a better performant. So I am proactively migrating company's codebase from angular 1.x to react 16.
- Currently, our company's mobile app is on Cordova Hybrid app but we are migrating to react-native. So I am actively contributing to it. Gave knowledge transfer sessions on react-native to my colleagues. <https://github.com/raydedon/ReactNativeToDoApp>

Following are the tech stack which defines me in the current organisation:-

On the web:-

react, redux, redux-thunk, redux-observables, angular 1.x, socket.io, webpack bundler, TypeScript

Native application:-

electronjs.

Visualization:-

d3.js

Mobile app:-

react-native, Cordova.

Backend:-

Nodejs, express, Java/J2EE, springs and hibernate

Database:-

mongodb, Oracle and mysql

Question Pro - Software Developer

12/2013 - 05/2016

QuestionPro has product on online Survey and analytical software. It provided me an opportunity to develop myself as a full stack developer. I do feature development and enhancement. At Question Pro the technology stacks consisted of the following:-

- Java/J2ee
- Struts 1.x
- Angular JS
- Node JS
- Grunt
- Ant Build Tool

Capella Web Solutions - Software Engineer

09/2011 - 12/2013

Capella is a service-based company where I contributed to delivering logistics-related software projects for the Dubai Trade portal. The primary technologies used in these projects included JAVA/J2EE, Struts 1 and 2, iBatis, jQuery, and JavaScript.

Metrixline - Software Engineer

07/2010 - 08/2011

Feature development for in house analytical product.

Tech Stack:-

Core Java, J2EE, Struts, Flex, Action Scripts, ILog, JSP, MySQL5.x.,
Tomcat 6, Ant
